PROJECTS

RESCUE.NET – Disaster Management System | Final Year | Backend *2024 – 2025*
Java (Spring Boot) | React.js | MongoDB | JWT | RESTful APIs

- Built the backend with Java and Spring Boot, exposing secure RESTful APIs for real-time disaster reporting, rescue team dispatch, and emergency resource allocation across affected zones.
- Designed MongoDB collections for disaster events, SOS alerts, rescue teams, and relief inventory, optimized for high-availability operations under crisis conditions.
- Implemented JWT-based authentication and RBAC for Admin, Rescue Coordinators, Field Teams, and Public Users, ensuring secure and structured access control.
- Integrated backend APIs with the React.js frontend, enabling a live incident dashboard with real-time status updates for ongoing disaster events.

Quiz Application – Android *2022 – 2023*
Java | Android Studio | Android SDK | Material Design

- Developed an Android quiz app with multiple categories, difficulty levels, countdown timer, and real-time scoring following Material Design guidelines.
